About this book

What is a collaborative crossword?

Unlike traditional crossword puzzles which are accompanied by appropriate clues, with collaborative crosswords pairs of learners are each given half of a complete crossword and must themselves provide their partners with the clues to help them complete their puzzle.

When should I use them?

Collaborative crosswords are well suited to introducing topics and presenting vocabulary that can then be used in further activities. They are a great way to warm up the class and tend to lead learners to ask questions which can be developed by attentive teachers into meaningful learning moments.

Why are they useful?

Collaborative crosswords are great for deepening vocabulary, raising fluency levels and improving spelling. By forcing learners to be inventive in their language use, it prepares them for situations where they may not have the exact language required and need to *talk around* the subject in order to communicate their point.

How do I use this book?

Make a double-sided photocopy of each crossword half, with the *vocabulary picture page* photocopied onto the other side. Learners first complete the vocabulary quiz - using a dictionary if necessary. Then they turn over the page and attempt to complete the crossword by taking it in turns to ask for a word which is needed to complete the puzzle. For example, *what is 7 across?*

Their partner now attempts to explain what the missing word is without using the word itself.

What level is this book aimed at?

This book is suitable for Elementary to Intermediate students. Higher level students may well know most of the vocabulary, but can still benefit from the communicative aspects of the activity.
